

Sagging Equipment

Part # SW-E Sagwatch

Used to accurately determine sag simply and rapidly. Water & shock resistant, it is antimagnetic and housed in a stainless steel case.

Scale	Capacity	Graduations
3rd Return	Sag up to 36 Feet	Feet & Decimals
5th Return	Sag up to 100 Feet	Feet & Decimals
Seconds	Seconds up to 30	Tenth of a second

Part # S22-771 Clipping Hook
6,500 lb capacity.

Part # 724 Sag Scope

The "Double Bubble" feature allows for vertical & horizontal leveling. The 3 x 9 power scope with cross hairs mounts easily to either wooden poles or steel structures. Kit includes a padded, high-impact storage case.

Part # CT40-160 Sagometer

An accurate thermometer encased in a section of aluminum conductor. This helps determine the temperature of the conductor being sagged. Range is -40° to 160° F.

Part # 21412-2J

Pocket Thermometer
This thermometer has a range from -50° to 120° F.

Dynamometers

Analog Dynamometers

Accurately displays weight in any direction within 1/2% of full scale. Shackles and cases are included.

5" Dials

Part #	Capacity & Divisions (lbs.)
30006-0035	2,000 x 20
30006-0050	5,000 x 50
30006-0084	10,000 x 100
30006-0100	20,000 x 200

10" Dials

Part #	Capacity & Divisions (lbs.)
30007-0109	20,000 x 100
30784-0017	30,000 x 200
30784-0025	40,000 x 200
30784-0033	50,000 x 200

Electronic Dynamometers

Its LCD displays 1" high digits and has an accuracy of 0.2% of capacity. Supplied with shackles only, cases sold separately.

Part #	Capacity x Resolution (lbs.)	Carrying Case
36190-0038	2,500 x 2	36244-0018
36190-0046	5,000 x 5	36244-0026
36190-0053	10,000 x 10	36244-0034
36190-0103	25,000 x 20	36244-0042

Line Gun Kit

Designed for transmission line construction which require long distance shooting of pull lines over rivers, across crevasses and other impassable terrain.

Part # CG58DU Line Gun Kit Consists of:

- Bridger Shoulder Line Gun With Line Cannister
- 10 Solid Brass Projectiles
- 4 Each 950', 70 lb Shot Lines
- 2 Each 780', 140 lb Shot Lines
